

Data Protection

Let's toast to Data Protection! We think this is very important and we want you to know about all the data we collect. Please note that we are **not** interested in collecting data beyond donating a toast to the good. Our web app will close on January 2, 2021 because let's have a toast is designed to be a time-limited movement. In order for letshaveatoast.app to still technically work, we collect some data. So let us explain how letshaveatoast.app works and what kind of data is collected.

You must enter a name to start the toasting process. This name does not have to be a real name. We capture the entered name and broadcast it later on the Lets have a Toast website. The broadcasted toast is timed and disappears after a few seconds. After that, your name disappears and will not be captured or shared with third parties. In the second step, you select an appropriate category to which you would like to donate. Behind each category there is a non-profit organization, except if you choose the category "The Creators" (all information about the non-profit organizations can be found in our Terms and Conditions).

A toast stores an id associated with the organization you are donating to. The id has **no** personal data. We need the id to broadcast your toast afterwards, but again, the toast is temporary and the id is gone afterwards with no data stored.

We do the same in the next step; the toast carries an id of your donation amount, which is broadcasted for a few seconds on the webapp (the toast is temporary and the id is gone afterwards with no data stored).

After that, the payment process starts. We have embedded paypal as a payment service. If you select any donation category except "The Creators", you will be redirected to the paypal account of the respective non-profit organization. Let's have a toast does not act as a middleman, so all your donations go directly to the organization without any detours.

Since we include paypal as a payment processor, please note that paypal has its own terms and conditions and its own privacy policy. You can find them here - we have no influence on paypal: <https://www.paypal.com/de/webapps/mpp/ua/legalhub-full>

If you select the category "The Creators", you donate to us, the creators (Yanik, Henrik and Nils) of Let's Have A Toast, the corresponding donation amount. Since we also use paypal for this, paypal has its own terms and conditions and its own privacy policy. You can find them here: <https://www.paypal.com/de/webapps/mpp/ua/legalhub-full>

We do not use any cookies! Parts of the lets have a toast web app are not tsl encrypted (no https) and publicly available - this is needed for others to see your toast, plus we do not own the donation accounts. Your browser provider may collect data about you. If you want to know which ones, you need to check your browser provider's terms and conditions.

We collect data of the status of the payment process paid/cancelled/pending. We need this as a prerequisite to broadcast your toast, but we will not save it after you have broadcasted the toast. Afterwards your Toast is broadcasted. The data is not encrypted and is publicly available because it is required for others to see your toast.

That's all. If you have any questions about privacy or terms and conditions, don't hesitate to reach out to us at any time - we'll be happy to help. If you find something we could improve, your feedback is more than welcome. We toast to your data protection!
